An experienced Frontend Engineer with a strong passion for learning, researching and building web applications that provides a great user experience.

PROFESSIONAL EXPERIENCE

InfoDevelopers Pvt. Ltd.

09/2023 – Present

Frontend Engineer (Onsite)

- Led the end-to-end development of new features, from initial concept through to deployment, maintaining exceptional code quality and performance throughout the process.
- Upgraded a legacy site with responsive design techniques, significantly enhancing accessibility and user experience across all devices, which led to improved client satisfaction.
- Refactored legacy code using memoization and optimization strategies, reducing unnecessary API calls and enhancing application performance.
- Successfully managed multiple concurrent projects, delivering comprehensive code reviews and maintaining consistency in coding standards to meet client expectations.

[Tech Stack used: React JS, TypeScript, Reactstrap, Tailwind, React Query, Redux, GitLab, Azure]

Aerion Technologies

01/2021 – 09/2023

Frontend Developer (Hybrid)

- Collaborated with designers to iterate on designs, refining UI/UX elements and ensuring their compatibility with the frontend implementation.
- Utilized Redux Saga middleware to manage asynchronous actions, including handling API calls, side effects, and data synchronization, resulting in improved application performance and reliability.
- Implemented the Apicurio API design tool to streamline the development process, allowing for efficient collaboration between frontend and backend teams in designing and documenting APIs.
- Integrated third-party APIs, including Zendesk script and Recommbee products, to provide additional functionalities and enhance the user experience.
- Actively participated in Agile development methodologies, including sprint planning, daily stand-ups, and retrospective meetings, to ensure efficient project management and timely delivery of features.

[Tech Stack used: React JS, TypeScript, Tailwind, Redux-toolkit, Storybook, Jest, Redux-Saga, Apicurio, Azure]

Otonomis Pvt. Ltd.

04/2019 – 12/2020

Web Developer (Hybrid)

- Designed widgets and created high-quality visual components by using lit programming for the company's web application.
- Utilize browser development tools and debugging techniques to identify and resolve frontend bugs efficiently.
- Implemented RESTful APIs by using Django Rest Framework (DRF) to connect the frontend and backend, ensuring smooth data flow and efficient communication between different components of the application.
- Utilized Django's ORM (Object-Relational Mapping) to model the database structure and implement data persistence.

[Tech Stack used: Django, HTML, CSS, React, Context Api, Axios, JavaScript, DRF, Jinja template, Azure]

EDUCATION

Anna University, Chennai, India

2014 - 2018

Bachelor of Engineering in Computer

- GPA – 7.67/10
